## SUMMARY

Frontend Software Developer with 5 years of experience building scalable, high-performance web applications and collaborating across cross-functional teams. Strong transferable skills in problem-solving, communication, and translating design and business requirements into maintainable code. Proficient in JavaScript, React, and Java, seeking a collaborative software development role focused on building reliable, user-centered applications and continuing growth in full-stack development.

## LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript | React, Angular, Spring Boot | MySQL Workbench

## EXPERIENCE

### KroiTales — LaunchCode Capstone Project

A front-end storytelling web application designed to provide an interactive and engaging reading experience for children and parents.

- Developed modular, reusable React components to support scalable and maintainable UI architecture
- Built responsive user interfaces using JavaScript, HTML, and CSS, ensuring cross-browser and cross-device compatibility
- Translated Figma wireframes into functional, accessible UI components with a focus on usability and design consistency
- Implemented dynamic content rendering to support interactive storytelling features
- Applied performance optimization techniques, including code splitting and lazy loading, to improve application load times

#### Full Project Tech Stack:

JavaScript, React, HTML, CSS, Git, GitHub

### Frontend Developer — Sisal Hub Albania

August 2021 – September 2023

- Built interactive web applications using , Angular, Vue.js, HTML5, CSS3, and JavaScript
- Integrated frontend components with backend services to support scalable applications
- Optimized performance through refactoring, browser caching, and image optimization
- Implemented authentication, routing, and state management in Angular-based SPAs
- Conducted code reviews and resolved production issues

### Frontend Developer — Primus Albania

May 2019 – July 2021

- Led migration of legacy frontend codebases to modern frameworks, improving maintainability and performance
- Translated UI/UX wireframes into reusable, pixel-perfect components
- Integrated third-party APIs and services to extend application functionality
- Conducted A/B testing and usability studies to improve user experience
- Mentored junior developers and contributed to shared component libraries

## EDUCATION

**LaunchCode** — *Software Development Program*  
*Frontend & Full-Stack Software Development*  
*In Progress*

- *JavaScript fundamentals, object-oriented programming, and testing with Jest*
- *Frontend development with React, component-based architecture, and state management*
- *Backend development with Java, Spring Boot, REST APIs, and MySQL*
- *Version control, Agile workflows, and collaborative software development practices*

**Canadian Institute of Technology** — *Bachelor's Degree*  
*Software Engineering*
